

GATE CSE 2028: Master Study Planner & Checklist

Target: 70-80% Syllabus Completion by August 2027 **Primary Resource:** Amit Khurana YouTube Playlists **Assessment Tools:** Topic-wise PYQs + Made Easy Test Series

Daily & Weekly Time Management (The 8 AM - 5 PM Constraint)

Since you have mandatory college classes from 8:00 AM to 5:00 PM, your study hours must be highly optimized to avoid burnout. Based on your handwritten notes, here is the mathematically calculated schedule to ensure you hit your goals:

Daily Schedule (Monday - Friday) — Target: 4 to 4.5 Hours

- **06:00 AM - 07:00 AM (1 Hour):** Morning Active Recall & PYQs (Your brain is fresh, do problem-solving here).
- **08:00 AM - 05:00 PM:** College Classes (Utilize 15-20 min gaps for flashcards or revising short notes).
- **05:00 PM - 07:00 PM:** Travel, Rest, and Dinner (Crucial for mental recovery).
- **07:00 PM - 09:30 PM (2.5 Hours):** Amit Khurana Lectures + Detailed Notes Generation.
- **09:30 PM - 10:30 PM (1 Hour):** Daily Revision (As per your notes: Lecture → Notes → Revision).

Weekly Schedule (Saturday & Sunday) — Target: 8 to 10 Hours/Day

- **Saturday (Consolidation):**
 - Past 7-Days Revision (Mandatory, as written in your notes).
 - Extended Lecture watching (Knock out long Amit Khurana videos).
 - Topic-wise PYQ solving.
- **Sunday (Assessment & Buffer):**
 - Made Easy Topic-wise Tests.
 - Clear any backlog from the week.
 - Half-day relaxation (Do not skip this, or you will burn out by 2027).

The Master Playlist Sequence & Checklist

Check off each box as you complete it. Never move to the Made Easy test until PYQs are fully solved.

Phase 1: Foundation & Logic (Mid-Sept 2026 – Nov 2026)

You need C Programming logic before starting DSA, and Discrete Math logic before TOC/DBMS.

General Aptitude (Parallel with core subjects - 30 mins daily)

- ☐ Watch Lectures: Quantitative Aptitude
- ☐ Watch Lectures: Spatial & Analytical Aptitude
- ☐ Solve Aptitude PYQs (2015-2026)
- ☐ Made Easy Test: General Aptitude Topic Tests

C Programming & Discrete Mathematics (DM)

- ☐ Watch Lectures: C Programming (Pointers, Arrays, Recursion)
- ☐ Solve PYQs: C Programming
- ☐ Watch Lectures: DM - Propositional & First-Order Logic
- ☐ Watch Lectures: DM - Combinatorics & Graph Theory
- ☐ Watch Lectures: DM - Set Theory & Group Theory
- ☐ Solve PYQs: Discrete Mathematics (Topic-wise)
- ☐ Made Easy Test: DM Subject Test

Phase 2: Core Hardware & Algorithms (Dec 2026 – Feb 2027)

Watch Amit Khurana's DSA and Digital Logic playlists.

Digital Logic (DL)

- ☐ Watch Lectures: Boolean Algebra & K-Maps
- ☐ Watch Lectures: Combinational Circuits (MUX, Decoders)
- ☐ Watch Lectures: Sequential Circuits (Flip Flops, Counters)
- ☐ Watch Lectures: Number Systems & IEEE 754
- ☐ Solve PYQs: Digital Logic (Topic-wise)
- ☐ Made Easy Test: DL Subject Test

Data Structures & Algorithms (DSA)

- ☐ Watch Lectures: Arrays, Stacks, Queues, Linked Lists
- ☐ Watch Lectures: Trees (BST, AVL) & Hashing
- ☐ Watch Lectures: Asymptotic Analysis & Searching/Sorting
- ☐ Watch Lectures: Graph Traversals, Greedy Algorithms, DP
- ☐ Solve PYQs: DSA (Topic-wise)
- ☐ Made Easy Test: DSA Subject Test

Phase 3: The Theoretical Core (March 2027 – April 2027)

Always study TOC immediately followed by Compiler Design.

Theory of Computation (TOC)

- ☐ Watch Lectures: Regular Languages, DFA/NFA
- ☐ Watch Lectures: Context-Free Grammars & PDA
- ☐ Watch Lectures: Turing Machines & Decidability
- ☐ Solve PYQs: TOC (Topic-wise)
- ☐ Made Easy Test: TOC Subject Test

Compiler Design (CD)

- ☐ Watch Lectures: Lexical Analysis
- ☐ Watch Lectures: Parsing (LL, LR, SLR)
- ☐ Watch Lectures: Syntax Directed Translation (SDT)
- ☐ Solve PYQs: Compiler Design (Topic-wise)
- ☐ Made Easy Test: CD Subject Test

Phase 4: Applied Systems (May 2027 – June 2027)

High weightage topics. Focus heavily on numericals and SQL.

Database Management Systems (DBMS)

- ☐ Watch Lectures: ER Models & Relational Algebra
- ☐ Watch Lectures: SQL Queries
- ☐ Watch Lectures: Normalization (1NF to BCNF)
- ☐ Watch Lectures: Transactions & Concurrency Control
- ☐ Solve PYQs: DBMS (Topic-wise)
- ☐ Made Easy Test: DBMS Subject Test

Operating Systems (OS)

- ☐ Watch Lectures: Process Management & CPU Scheduling
- ☐ Watch Lectures: Process Synchronization (Semaphores)
- ☐ Watch Lectures: Deadlocks & Banker's Algorithm
- ☐ Watch Lectures: Memory Management & Paging
- ☐ Solve PYQs: OS (Topic-wise)
- ☐ Made Easy Test: OS Subject Test

Phase 5: High-Yield Networking & Math (July 2027 – August 2027)

Amit Khurana's CN playlist is massive (~202 videos). To hit your 70-80% target safely, prioritize the highest-weightage topics here.

Computer Networks (CN) - *Curated*

- ☐ Watch Lectures: Data Link Layer (CSMA/CD, Sliding Window)
- ☐ Watch Lectures: Network Layer (IPv4, Subnetting, Routing)
- ☐ Watch Lectures: Transport Layer (TCP, UDP, Congestion Control)
- ☐ Solve PYQs: CN (Topic-wise)
- ☐ Made Easy Test: CN Subject Test

Engineering Mathematics

- ☐ Watch Lectures: Linear Algebra (Matrices, Eigenvalues)
- ☐ Watch Lectures: Calculus (Limits, Maxima/Minima)
- ☐ Watch Lectures: Probability & Statistics (Distributions, Bayes)
- ☐ Solve PYQs: Engineering Mathematics
- ☐ Made Easy Test: Engg Maths Subject Test

🏁 August 2027 Checkpoint Reached

By August 2027, according to your handwritten planner, you will have completed exactly 70-80% of the core GATE syllabus.

Next Steps (September 2027 - Jan 2028): As per your image notes:

- **Nov 2027:** First Full Revision + Practice + Made Easy Mixed Subject Tests.
- **Dec 2027:** Second Full Revision + Full Length Tests.
- **Jan 2028:** Third Full Revision + Ultimate Full Length Mock Tests.
